

Mind over Matter – Telekinesis.

In the field of parapsychology, the phrase has been used to describe paranormal phenomena such as psychokinesis.

From Wikipedia:

Psychokinesis (Greek ψυχή κίνησις, "mind movement"), or telekinesis (τῆλε κίνησις, "distance movement"), is an alleged psychic ability allowing a person to influence a physical system without physical interaction. Psychokinesis and telekinesis are sometimes abbreviated as PK and TK respectively. Examples of psychokinesis could include moving an object and levitation. There is no conclusive evidence that psychokinesis is a real phenomenon.

Telekinesis, also called psychokinesis (PK) or simply “mind over matter,” is the ability to move objects with no physical contact strictly using the powers of the mind alone. It is, perhaps, one of the rarest of all the psychic abilities as very few people have demonstrated this fascinating phenomenon and there are still many skeptics who do not believe telekinesis is even possible.

Moving Objects with the Power of the Mind – Telekinesis –

Some famous people known for having telekinetic abilities include Miroslaw Magola alias Magnetic Man, one of the most well known psychics in all the world who become widely

known after appearing on a British ITV " Beyond Belief" hosted by BBC broadcaster Sir David Frost , Discovery Channel and History " Stan Lee's Superhumans - Mind Force " hosted by Stan Lee and Daniel Browning Smith , German TV Prosieben "Galileo" "Magnet Mann" hosted by Aiman Abdallah and Stefan Goedde , TV PRO7 "Arabella" hosted by Cosima Arabella Kiesbauer, German TV Sat.1 "Clever " Die Show, die Wissen schafft " hosted by Wigald Boning and Barbare Eligmann with Verona Pooth and Sido produced by Constantin Entertainment , RTL2 , France Channel TF1 " La Soirée de l'etrange " hosted by Christophe Dechavanne and Patrice Carmouze produced by Coyote, TV SRT - Swiss Radio and Television Albert Einstein - The theory of relativity, Swiss TV Telebasel hosted by Tamara Wernli –Basel Psi-Tage - Alex Schneider , Fuji Television (Japan) „ Unbelievable " , China Television CCTV America and India TV History " Superhuman ".

The Huffington Post wrote - Miroslaw Magola claims he's a human magnet, Daily Mail - Meet the real life Magneto - German psychic claims he uses telepathic powers to manipulate metal just like X-Men supervillain, Journal of Parapsychology, Psychology Today, and many books, blogs and social media are featuring and writing about Miroslaw Magola who have the ability to move an object by his subconscious mind

Moreover this phenomenon deals with overcoming the power of gravity, which according to the known and generally accepted laws of physics should not be possible, and yet, as can be clearly seen by people who have witnessed Magola, is absolutely possible.

Besides the remarkable feats of Magola , Russian Nina Kulagina's telekinetic powers were captured on film, and Stanislaw Tomczyk, a Polish woman living in early 1900s, demonstrated her remarkable telekinesis abilities in a controlled testing environment in front of many witnesses.

Nina Kulagina, Eusapia Palladino, Swami Rama, Uri Geller and Miroslaw Magola are some of the famous people who have claimed and demonstrated telekinetic abilities.

The control and power of telekinesis is largely unknown, but many parapsychologists believe people can train their mind in order to affect the physical world.

Metaphysics expert Dr. Ellie Crystal said: "Everyone has the potential to be able to be telekinetic. "Telekinesis is created by higher levels of consciousness. It cannot be created by "wishing it" to happen on the physical level. The energy to move an object is created by a person's thoughts created by their subconscious mind."

Dr. Michio Kaku is the author of several widely acclaimed science books, including Parallel Worlds, Visions, Beyond Einstein, Hyperspace and Physics of the Impossible, the basis for his Science Channel TV show, Sci Fi Science: Physics of the Impossible and the host of two radio programs, Explorations and Science Fantastic said in his latest work, The Future of the Mind, uses his brand of theoretical physics - a beguiling mix of quantumness and consciousness - to push past the current frontiers of neuroscience.

The worlds media spoke with this bravely unusual mind about where today's most daring scientific research is taking our brains. Our sit-down adventure included storied science notions like telekinesis, implantable knowledge, memory erasure, and even sentient robots. I was asking myself, could this be the answer I'm looking for? could this media help me .. prove there is a telekinesis real ? or is it just another hoax .

Magola was investigated by Prof. Dr. Dr. Ruhenstroth--Bauer and Dr. Friedbert Karger of the Max Planck Institute and Dr. David Lewis (psychologist), a neurophysiologist at MindLab, one of the United Kingdom's leading neuro-research centers and Dr. Konstantin Korotkov, professor of Physics at St. Petersburg State Technical University in Russia and Alexander Imich from USA.
